MERCEDES-BENZ 280 SE

You don't drive it, you take it off: In September 1967 the 280 SE Cabriolet made its debut as the most powerful 6-Cylinder version of the W111 with a 2,8 liter engine that produces 160 hp. With only 1.390 units built, the 280 SE is extremely rare and is one of the most sought-after classic cars of its time. With this automobile restored in BRABUS Classic 6 star quality, we revive the exclusive driving experience - as if it were 1969.

PERFORMANCE & FUEL ECONOMY

TECHNICAL DATA

| Engine size | 2778 cm ³ |
| Power | 118 kW / 160 PS |
| Registration date | 18.11.1969 |
| Mileage | 0 km (after restauration) |
| 0-100 km/h | 10.5 s |
| Vmax | 185 km/h / 115 mph |

PRICE

| | |
|--|----------------|
| Sale price ex works | |
| Bottrop §25a VAT is not reclaimable | 498.000,00 EUR |

NOTICES

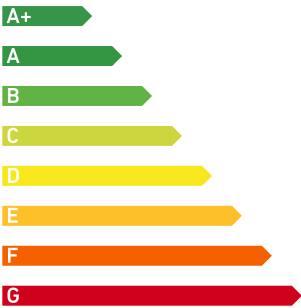

*All listed performance figures are approximate values. They depend on vehicle-specific details such as the vehicle type, equipment, tare weight, rear-axle ratio, wheel-tyre combinations, transmission type and aerodynamic equipment of the specific car. Figures about performance increases and/or performance kits are to be understood as average values. Test-dependent divergences of +/- 5% are possible. Figures about the overall performance of changed factory engines through performance increases and/or performance kits are based on the manufacturer's data listed in the vehicle registration document. They can vary by +/- 5%. BRABUS does not warrant any further reduced performance of factory engines. Specifications are subject to change without prior notice. These values were determined using the prescribed measurement procedure (directive 80/1268/EEC in its currently valid version). The details are not based on a single vehicle, and do not form a component of the offer, but serve only for purposes of comparison between different vehicle types.

**All prices are quoted ex works.

EFFICIENCY & FUEL ECONOMY

| |
|----------------------|
| Fuel Economy* |
| city l/100km |
| highway l/100km |
| combined l/100km |
| CO ₂ g/km |

CO₂-EFFICIENCY*

* Determined based on the measured CO2 emissions in consideration of the vehicle mass.
