BRABUS Classic pre-delivery check and first service

BRABUS Classic photobook with restoration documentation

MERCEDES-BENZ 280 SE 3.5

You don't drive it, you take it off: In September 1969 the 280 SE 3.5 Cabriolet made it's debut as the most powerful version of the W111 with a completely newly developed 3.5-litre V8 engine. With only 1,232 units built, the top model is extremely rare and is one of the most sought-after classic cars of its time. With this automobile restored in BRABUS Classic 6 star quality, we revive the exclusive driving experience - as if it were 1969.

PERFORMANCE & FUEL ECONOMY

TECHNICAL DATA

Engine	8-Cylinder
Engine size	3499 cm ³
Power	147 kW / 200 PS
Registration date	24.06.1970
Mileage	0 km (after restauration)
0-100 km/h	9,4 s
Vmax	205 km/h / 127 mph

PRICE

Sale price ex works	
Bottrop §25a VAT is not reclaimable	698.000,00 EUR

NOTICES

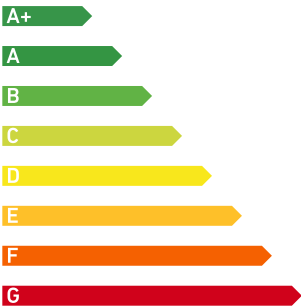

*All listed performance figures are approximate values. They depend on vehicle-specific details such as the vehicle type, equipment, tare weight, rear-axle ratio, wheel-tyre combinations, transmission type and aerodynamic equipment of the specific car. Figures about performance increases and/or performance kits are to be understood as average values. Test-dependent divergences of +/- 5% are possible. Figures about the overall performance of changed factory engines through performance increases and/or performance kits are based on the manufacturer's data listed in the vehicle registration document. They can vary by +/- 5%. BRABUS does not warrant any further reduced performance of factory engines. Specifications are subject to change without prior notice. These values were determined using the prescribed measurement procedure (directive 80/1268/EEC in its currently valid version). The details are not based on a single vehicle, and do not form a component of the offer, but serve only for purposes of comparison between different vehicle types.

**All prices are quoted ex works.

EFFICIENCY & FUEL ECONOMY

Fuel Economy*
city - l/100km
highway - l/100km
combined - l/100km
CO ₂ - g/km

CO₂-EFFICIENCY*

* Determined based on the measured CO2 emissions in consideration of the vehicle mass.
